SRIKANT PANDEY

Full-Stack Developer

srisrikantpandey@gmail.com | github.com/deltacoder2603 | linkedin.com/in/srikant-pandey-b55935209

SUMMARY

I am an innovative full-stack developer focused on AI and Web3 technologies. With experience in designing and deploying intelligent systems, I thrive in creating impactful solutions, from AI-powered applications to decentralized technologies. I continuously seek to enhance my skillset and contribute to projects that leverage modern tech stacks, including React, Node.js, and Python

EXPERIENCE

Junior AI Engineer

Idiotic Media

📅 06/2025 - 01/1970

Company focused on leveraging AI technologies for media applications

- Developing and deploying AI models for diverse real-world applications
- Collaborating with cross-functional teams to create innovative AI-driven solutions
- Enhancing and maintaining the company's AI infrastructure and internal tools

Technical Lead

E-Cell, PSIT Kanpur

📅 10/2024 - 01/1970

An entrepreneurial cell for fostering innovation and startup culture

- Leading technical projects and development teams within the pre-incubation cell
- Mentoring junior developers and guiding critical technical decisions
- Strengthening the pre-incubation ecosystem by managing infrastructure and streamlining development processes

Web Developer Intern

CodeKid

📅 02/2025 - 03/2025

A company focused on engaging students in coding through innovative platforms

- Independently designed, developed, and deployed the entire CodeKid website
- Implemented responsive design and modern UI/UX principles for a smooth user experience
- Optimized website performance while ensuring alignment with the project's goals

EDUCATION

B.Tech in Computer Science and Engineering

PSIT Kanpur

📅 09/2023 - 08/2027

Senior Secondary School

St. Joseph's College(ISC)

📅 04/2009 - 03/2022

SKILLS

Blockchain   CSS   Git   GitHub

HTML   JavaScript   Next.js

Python   React   Tailwind

TypeScript   Node.js   Express.js

FASTAPI

PROJECTS

Video Editor

AI Video Processing Platform focused on real-time privacy and high-performance editing

- Created a privacy-focused video editor with features like profanity detection (English & Hindi), auto-muting, segment trimming, and Whisper-based transcription
- Built with Next.js, FFmpeg, and Tailwind for fast, real-time editing

GitMaster

Github Repository Assistant designed to aid developers in code comprehension

- Developed an AI assistant that analyzes full GitHub repositories and answers natural language questions using LLM's
- Helps developers quickly understand complex codebases without reading the entire code

Derplexity

AI tool that improves search efficiency through content summarization

- Built an AI tool that enhances Google search by scraping top result URLs and summarizing content using LLM's
- Delivers concise, context-rich answers to reduce information overload and improve search efficiency
